(54) PORTABLE FUEL CELL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a portable fuel cell by which the temperature distribution in a battery stack at fuel cell starting time can be efficiently uniformized.

SOLUTION: A plane-shaped starting heater 33 is arranged in a contact shape over the whole on outside surfaces of both end plates 33 of a fuel cell main body 3. The starting heater 33 is actuated by electric power generated by the fuel cell main body 3, and raises a temperature in the vicinity of an outside surface in the fuel cell main body 3, and uniformizes the temperature distribution in the fuel cell main body 3.
